CAREER SUMMARY

Full-stack developer with 4+ years building enterprise web applications across banking, finance, government and technology sectors using PHP/Laravel and React. Seeking to contribute technical and project expertise to high-performing web development agency teams in contract or permanent roles

SKILLS PROFILE

Technical Skills

- **Languages/Frameworks:** PHP, Laravel, JavaScript, React, WordPress
- **Databases/Tools:** MySQL, Docker, Git
- **Frontend/UI:** Bootstrap, Tailwind CSS, APIs, Responsive Design
- **Methodologies:** Agile/Scrum, Clean Code, Unit Testing

Transferable Skills

- Strong problem-solving & debugging
- Collaboration & teamwork in Agile environments
- Effective client communication & stakeholder management
- Time management & ability to meet deadlines
- Adaptability and quick learning of new technologies

WORK EXPERIENCE

Focus Bear, Melbourne

APR 2025 - JUL 2025

Frontend Developer (React)

Key responsibilities:

- Assisted in developing new features, enhancing performance, and resolving bugs for the Focus Bear productivity app, including fixing 25 bugs and delivering 10 feature enhancements
- Resolved 62 issues in the onboarding module of the intern repository using React, Redux, Tailwind CSS, clean code practices, Git, and unit testing
- Collaborated with the mobile development team on code reviews, feature design, and maintaining consistent UI/UX standards
- Participated in daily stand-ups, sprint retrospectives, and other Agile ceremonies, following Agile methodologies to support efficient and continuous software delivery

Quinlan Consulting, Melbourne

JUL 2023 - OCT 2023

Web Development Intern

Key responsibilities:

- Developed and customized 3 WordPress websites by setting up environments, installing themes/plugins, and adjusting layouts based on client feedback — resulting in improved user satisfaction
- Increased page load speed by 25% through performance optimization and MySQL database normalization, enhancing overall site responsiveness
- Resolved 15+ technical issues and bugs across multiple client sites and documented processes to support future maintenance and updates
- Worked closely with designers and clients to understand project requirements and deliver functional websites on time and to scope

Neputer Tech, Nepal

JUL 2018 – DEC 2021

PHP(Laravel) Developer

Key responsibilities:

- Delivered 10+ enterprise-grade web applications for banking, recruitment, and government using PHP (Laravel) and JavaScript, developing robust backends, databases, and APIs

- Improved system performance and scalability by 40% through migrating legacy job portals from CodeIgniter to Laravel
- Integrated payment gateways, Google APIs, and social logins, boosting checkout success by 20% and reducing manual sign-ups by 35%
- Improved team efficiency and deployment speed by using Git for version control, Trello for task tracking, and following Agile workflows

Key Achievement:

- Enhanced system performance by 40%, increasing traffic and user sign-ups, directly boosting company revenue and growth

RECENT PROJECTS

Task Flow Web App

- Develop a full-featured task management application using React for frontend and PHP (Laravel) for backend, with drag-and-drop functionality and real-time task updates to enhance team productivity.
- Build secure user authentication and robust backend APIs in Laravel/PHP to support scalable and efficient task operations.
